

Countering Hybrid Threats: the EU approach

[John Maas@eeas.europa.eu](mailto:John.Maas@eeas.europa.eu)

Situational Awareness - Do we really know what's going on?

Traditional borders and boundaries are no longer traditional

Do we understand what we are seeing?

Threats are hybrid when they form complex Strategies...

Hybrid Warfare Activities Are Persistent, Their Level of Escalation Varies, and They Are Ongoing

COURSES EVENTS

Russia is Already in the Game

Our old adversary is already mastering this new type of warfare. The Russian toolkit of wide variety of instruments that can be applied against a target. The recent uses of these instruments indicate the extent of the challenge the West now faces.

Russians already see themselves being in conflict with us, which is why they have developed various instruments from their toolkit against the West. All these serve Moscow's political goals.

All these serve Moscow's political goals.

As we have witnessed, Russia conducts information warfare activities in an industrial manner. Ethnic Russians outside 'Mother Russia' are taken as a tool for blackmail and to build new dependencies for later use.

of in justifying diplomatic bullying, and military forces are used to intimidate and threaten neighboring countries and NATO members farther away. Furthermore, Russia exploits issues—both as a tool for blackmail and to build new dependencies for later use.

Despite Russia's WTO membership, trade is applied as a weapon for example by limiting from the West and by threatening to deny exports critical to trade partner's industries, economic links are taken advantage of, such as using sovereign debt as pressuring.

Financial means are used not only to lobby, but given out as loans to buy political and financing NGOs and popular movements that can help reaching Kremlin's goals. More Russian individuals and companies are buying stakes in Western critical infrastructure resources, investing in land plots located next to critical military installations.

Russia has also engaged in lawfare, utilizing legal agreements and frameworks, to set Kremlin is also a major cyberpower, as the Pentagon recently noted. Members of parliament, and hundreds of private sector companies have been subjected to sophisticated attacks. Most worrisome, nuclear threats have been brought back to the table to test and determination.

This all leads to an unsettling conclusion that Russia has already mobilized and deployed its hybrid instruments against the West.

Long or short term

There Are Wide-Array of Tools and Means Available for Conducting Hybrid Warfare

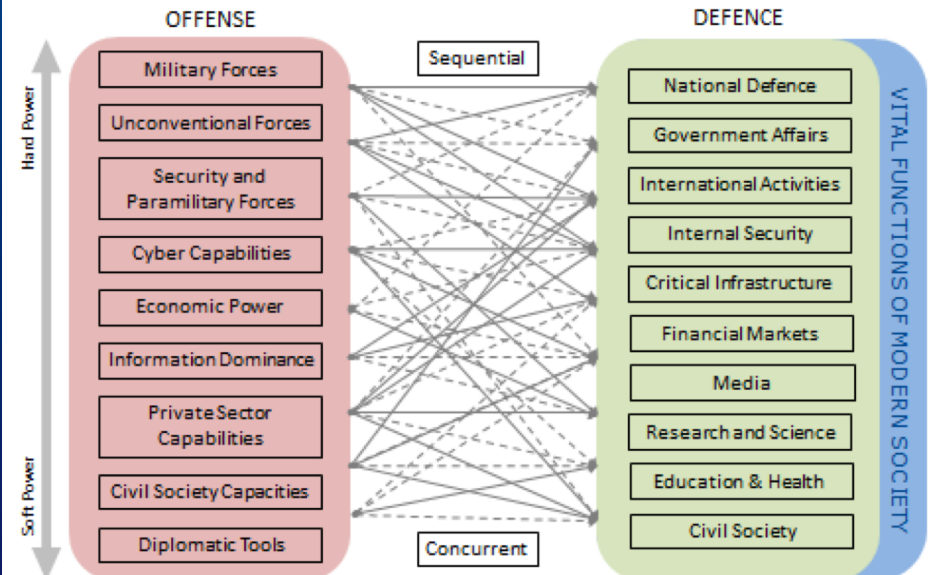

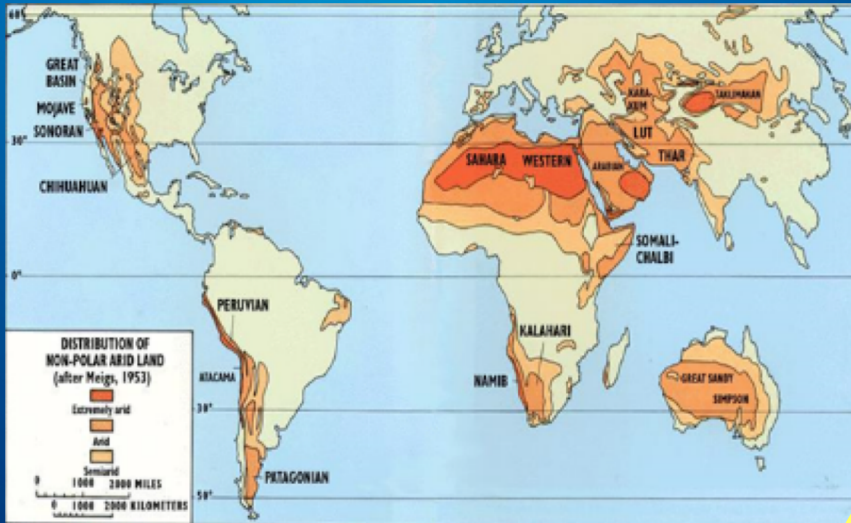

Diagram has been inspired by Anton Derpiga's (AT) Work on the Subject

What do we already know about ungovernable spaces?

Challenges ... Climate affects :

Humanitarian crises / Disease
/Ungovernable spaces
Urbanisation / Migration

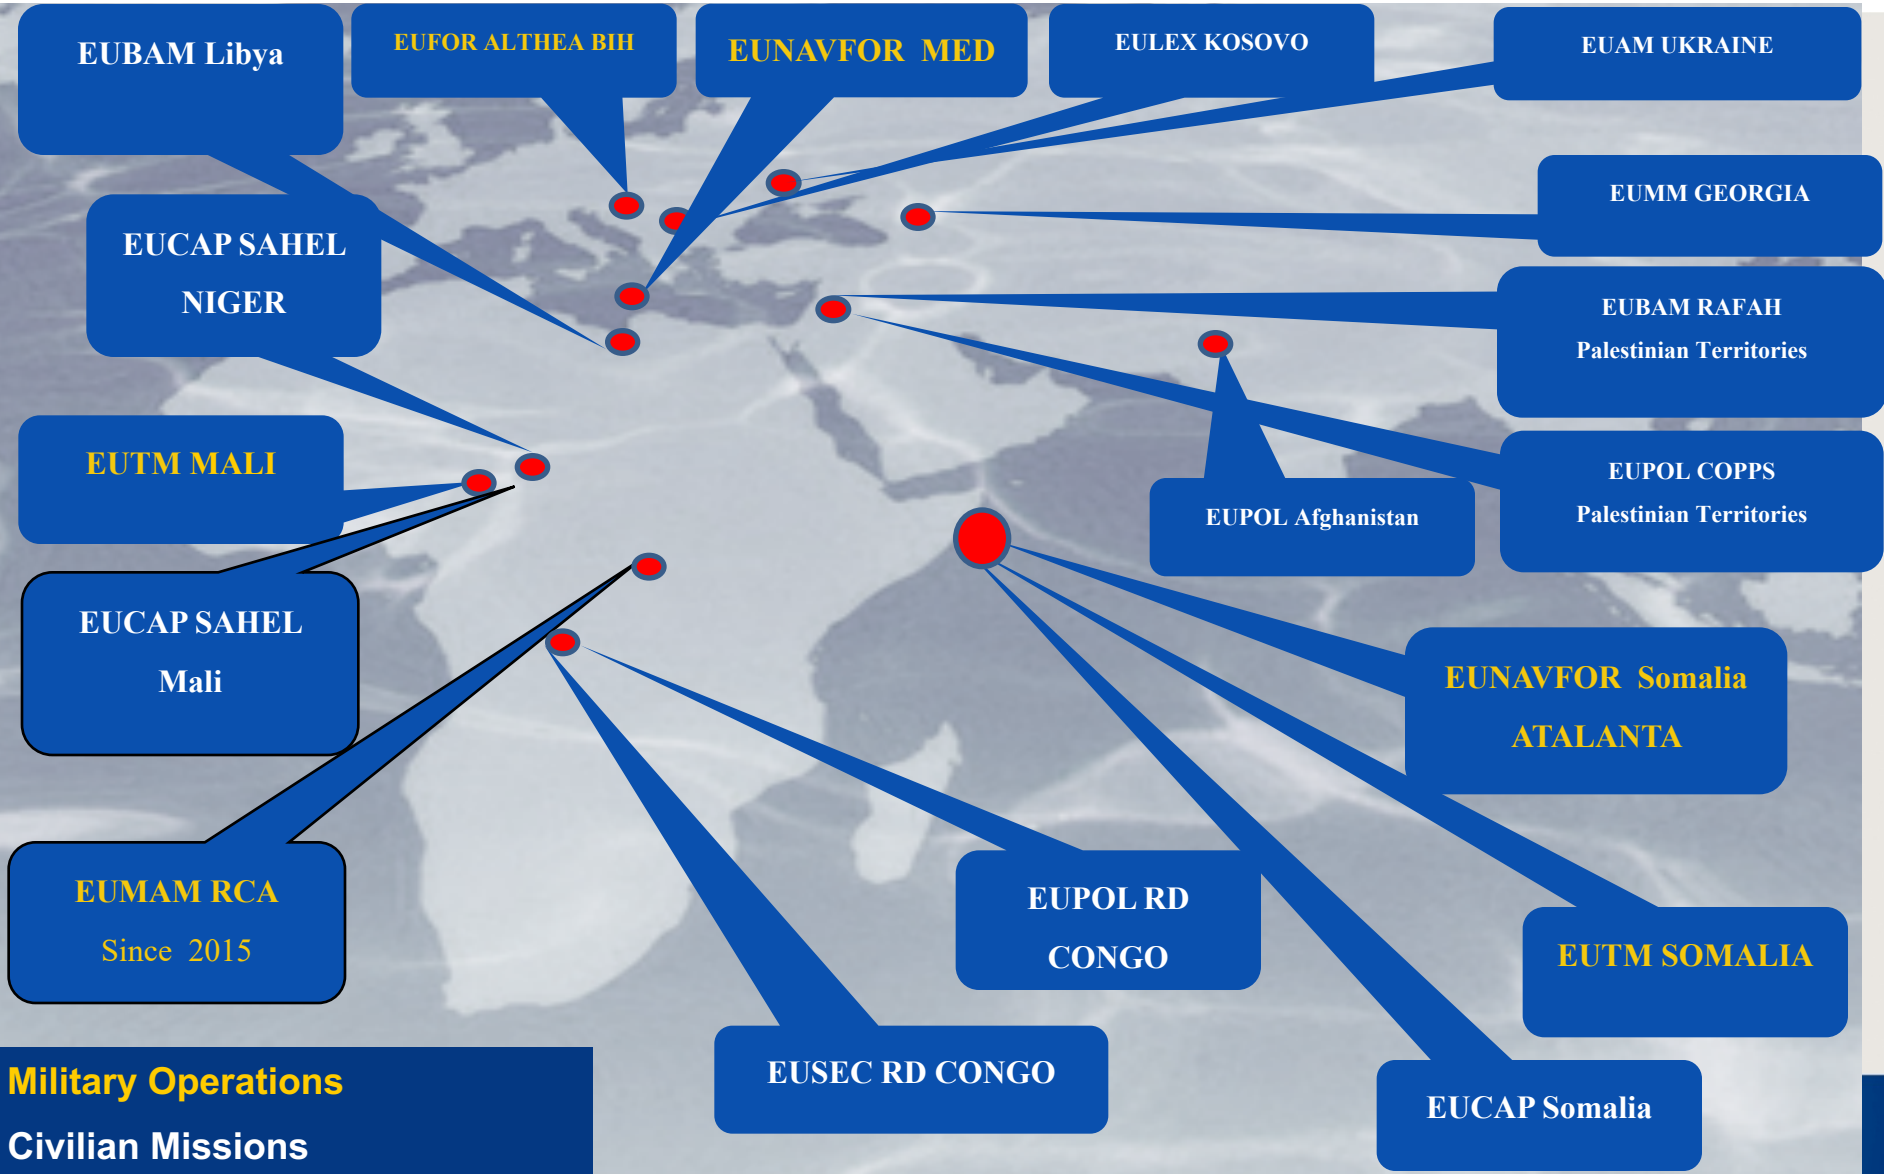

Direct link between ungovernable spaces and security risks. This now parallels with data, and cyberspace.

European Union
EXTERNAL ACTION

European Missions/Operations spaces

Military Operations
Civilian Missions

Issues that lead to stress in society or between states:

Water

- Too much
- Too little

Resources

- Energy needs
- Mineral wealth

Rule of Law

- Key to secure environment

Urbanisation of populations

Future Character of Conflict how do we configure?

Cost:

Key Challenge in Hybrid scenarios:
Can a modern army deliver long term effect in the Urban environment?

Risk:

Can you operate without boots on the ground ?

If not what force in a modern contested space?

Addressing the Hybrid Situation

EU - Competencies

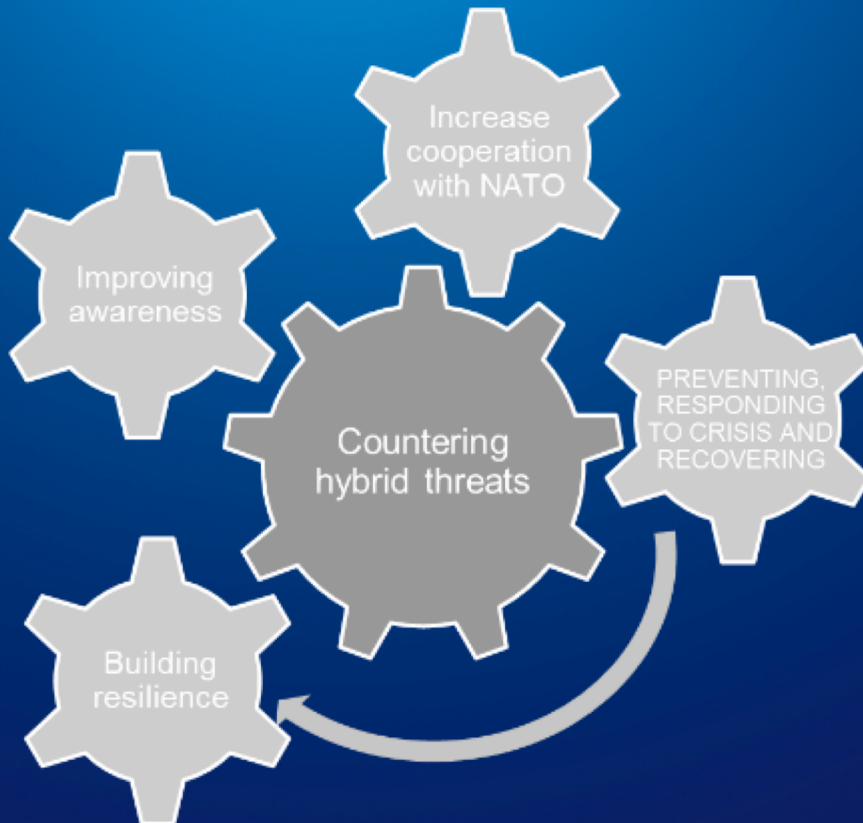

Improving Situational Awareness and Early Warning – Fusion Cell

Cyber – Cyber Pledge, Diplomatic Tool box

Crisis Response – Operational Protocol

Building Resilience - Comprehensive Response

Joint Communication – adopted 6 April 2016

HIGH REPRESENTATIVE
OF THE UNION FOR
FOREIGN AFFAIRS AND
SECURITY POLICY

Brussels, 6.4.2016
JOIN(2016) 18 final

JOINT COMMUNICATION TO THE EUROPEAN PARLIAMENT AND THE
COUNCIL

Joint Framework on countering hybrid threats

a European Union response

European Union
EXTERNAL ACTION

Countering hybrid threats through Comprehensive Reaction

Comprehensive action through consensus

Sanctions Policy

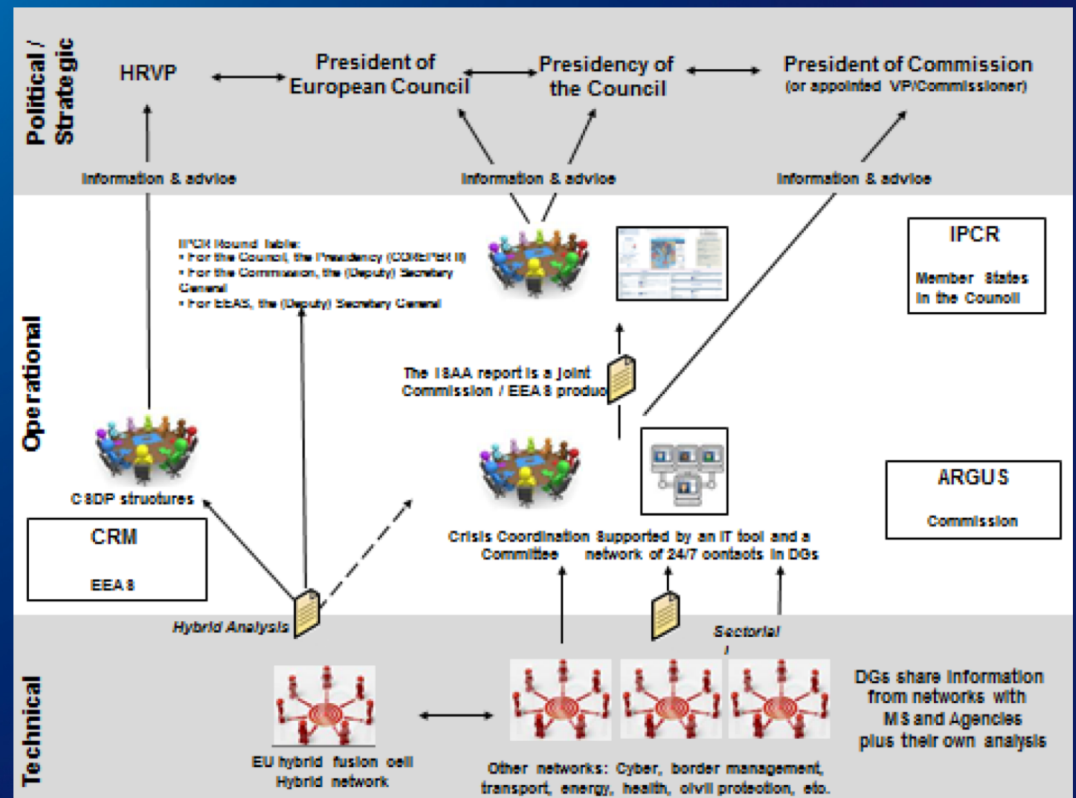

STRATCOMM

Key to Crisis Response Building the link between Internal and External Security

***Integrated Response/Whole of Government Approach:
required to counter diverse challenges***

Potential threats :

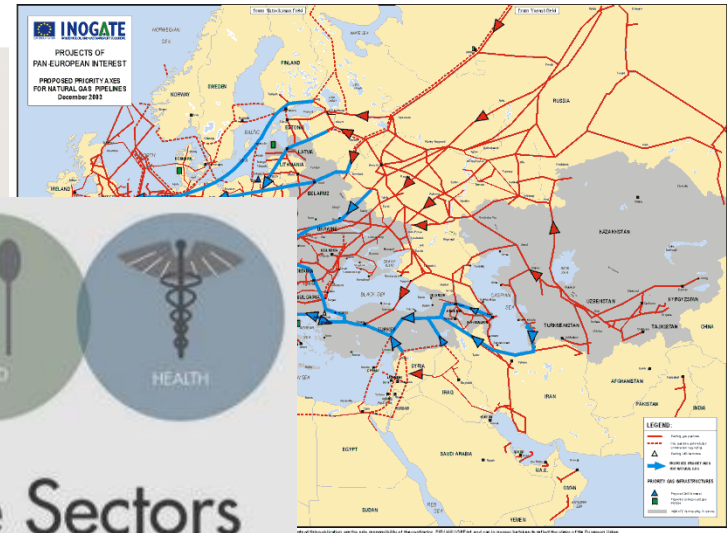

- Cyber attack
- Psychological Operations
- Terrorism/Sabotage
- Economic Pressure
- Energy exploitation
- Strengthening Secessionists
- Use of Criminal Gangs
- Military Pressure

European Union
EXTERNAL ACTION

EU Approach - Building resilience
