Canada's National Cyber Security Strategy

CBM#2 - ICTs Security Policies & Strategies 26 March 2019 Los E.D. Tupling, Senior Policy Advisor International Cyber Security Policy Global Affairs Canada

Public Safety Sécurité publique Canada Canada

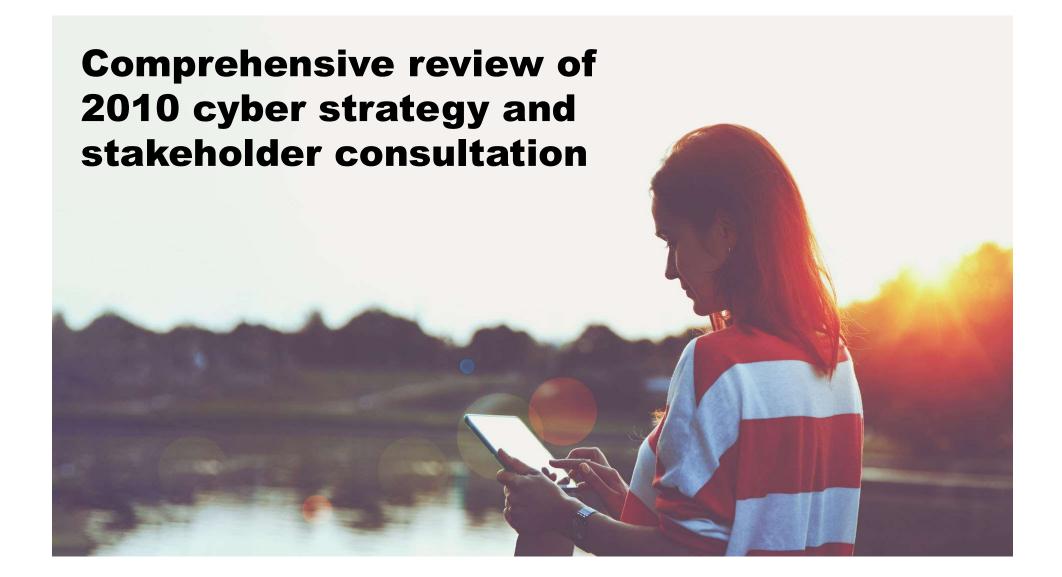

Changing landscape of our digital society

Growth in threats to business

Growth in threats to systems of importance

Opportunity for Canadians and our economy

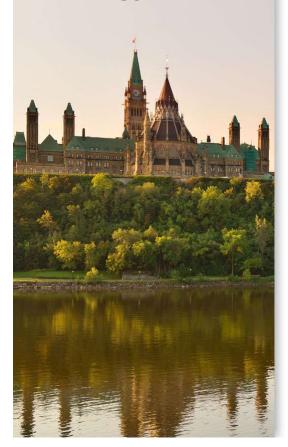

Our new National Cyber Security Strategy

Collaborate with partners to ensure Secure and Resilient Canadian Systems

Invest in an Innovative and Adaptive Ecosystem

Take a leading role domestically and internationally through Effective Leadership and Collaboration

Our new National Cyber Security Strategy

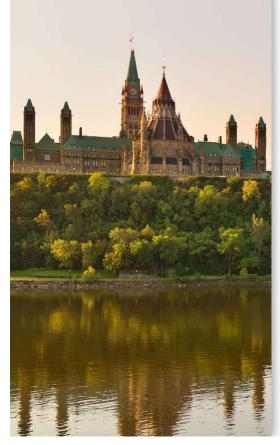

Collaborate with partners to ensure Secure and Resilient Canadian Systems

Our businesses and critical infrastructure depend on digital technologies to run their operations and keep us – their customers – supplied with goods, power, transportation, health care, etc.

Our citizens look for security of their data and safety from crime in cyberspace

National Cyber Security Strategy – Canada's Vision for Security and Prosperity in the Digital Age

Our new National Cyber Security Strategy

Invest in an Innovative and Adaptive Ecosystem

Technological advancement through digital networks and the use of mobile devices has been matched by the growth in the cyber threats. Businesses – large and small – face potentially enormous financial and reputational losses.

National Cyber Security Strategy – Canada's Vision for Security and Prosperity in the Digital Age The **Canadian Survey of Cyber Security and Cybercrime** is the first of its kind in Canada and only the second in the world.

employees

Focus on **economic impact** of cybercrime, not social issues such as cyberbullying or online harassment.

The Cyber Security Cooperation Program (CSCP) is the only Government of Canada **Grants and Contributions** program dedicated to supporting projects aimed at improving the security of Canada's cyber systems.

Budget 2018 allocated additional funding towards the **renewal and expansion** of the Cyber Security Cooperation Program

The Cyber Security Cooperation Program will promote projects in **support of all three** goals of the National Cyber Security Strategy

Our new National Cyber Security Strategy

Take a leading role domestically and internationally through **Effective Leadership, Governance and Collaboration**

In collaboration with provinces, territories, academia and the private sector, the federal government will take a leadership role to advance cyber security in Canada and will, in coordination with allies, work to shape the international cyber security environment in Canada's favour.

National Cyber Security Strategy – Canada's Vision for Security and Prosperity in the Digital Age

Looking to the Future: A safe and secure cyberspace is important for Canada's security, stability, and prosperity.

Cyber security is a **shared responsibility**.

The implementation of the Strategy will require cooperation.
