ARF WORK PLAN

on Security of and in the Use of Information and Communications Technologies (ICT)

ARF WORK PLAN

on Security of and in the Use of Information and Communications Technologies (ICT)

UNGGE

CBM

- i. Identify and establish **points of contact** at the policy and technical levels;
- ii. Develop **mechanisms and processes** to enhance inter-State confidence-building;
- iii. Encourage transparency via **information sharing** of various aspects of national and transnational threats;
- iv. **information sharing** of categories of critical infrastructure & efforts to protect them, including national laws and policies for CIP
 - a) Develop a **repository** of national laws and policies;
 - b) Develop **mechanisms and processes on CIP**;
 - c) Develop **technical, legal and diplomatic mechanisms to address ICT-related requests**
 - d) classify **ICT incidents in terms of the scale and seriousness** of the incident, to facilitate the **exchange of information on incidents**.
- v. Strengthen cooperative mechanisms between relevant agencies to address ICT security incidents;
- vi. Enhance cooperation, including the development of focal points for the exchange of information on malicious ICT use and the provision of assistance in investigations;
- vii. Establish a national CERT and/or CSIRT or officially designate an organization to fulfil this role

ARF WORK PLAN

on Security of and in the Use of Information
and Communications Technologies (ICT)

Conclusion

- Focusing CBMs at regional level is more practical to produce effective outcomes;
- Align with UNGGE Report - CBMs, capacity building and rules, norms and principles of responsible behavior;
- ARF cyber CBMs can be implemented through:
 - Establishment of open ended Study Group on CBMs
 - Conduct workshops & seminar which support the work of the Study Group

ASEAN REGIONAL FORUM
