

OP COVID-19 Assist: Australian Defence Force engagement in the civilian response to COVID-19

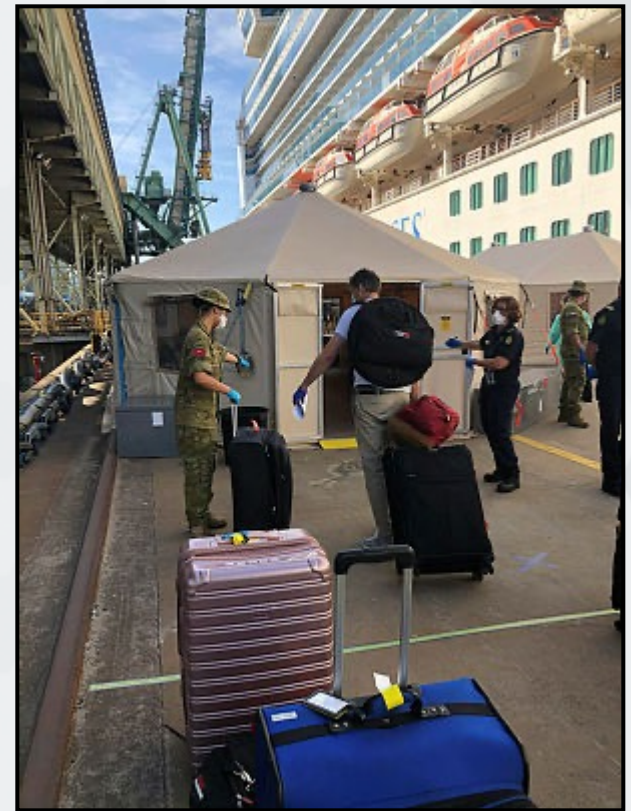

MAJ Katrina Roper, PhD, M.App.Epid.
SO2 Epidemiology

Main elements of ADF engagement in the Australian civilian response to COVID-19

- 
- Use of ADF personnel to support the AUS civilian response – contact tracing, testing ...
 - ADF medical team in response to the outbreak in Burnie, Tasmania – staffing a public hospital
 - Secondment of ADF personnel to national, state and territory incident rooms – information sharing
 - Engagement of the ADFSG as a member of the AHPPC – engagement with decision making

Assisting arriving passengers – transport to hotel and welfare checks while in quarantine

Contact tracing in public health units

Provision of medical teams to support civilian hospitals

Support to quarantine - disinfecting surfaces
